

Nguyen Truong Giang

Ho Chi Minh | truonggiang.axyl@gmail.com | 0353 067 717

nguyentruonggiang.id.vn | github.com/Axyl1410

Skills

- **Programming language:** Javascript, Typescript, Java
- Frontend technology: Reactjs, Nextjs, Tailwind
- Backend technology: Spring boot, Expressjs, Nestjs
- Database: MySQL, MongoDB
- Other: Git, Github, Postman, Prisma

Projects

Otis Valen - Awwwards Clone

[GitHub](#) | [Live Demo](#)

- Recreated a high-fidelity clone of an Awwwards-winning website, focusing on advanced UI interactions and aesthetic precision.
- Implemented complex animations and page transitions using **GSAP**, enhancing visual engagement.
- Integrated **Lenis Scroll** for smooth scrolling experiences and parallax effects, mimicking high-end production standards.
- Ensured pixel-perfect responsiveness across all devices using **Tailwind CSS** and modern layout techniques (Grid/Flexbox).

Format Archive

[GitHub](#) | [Live Demo](#)

- Developed a visually stunning e-commerce UI demonstration platform, focusing on creating a premium and highly engaging user experience.
- Engineered complex, performance-optimized animations using **GSAP**, Integrated Lenis Scroll for smooth scrolling experiences and seamless page transitions.
- Ensured a pixel-perfect, fully responsive design that maintains fluid, jank-free animations across all mobile and desktop viewports.

Mindustry Tool Next

[GitHub](#) | [Live Demo](#)

- Developed a centralized platform for archiving Mindustry game plugins and mods using **Next.js (App Router)** and **TypeScript**.
- Implemented **Static Site Generation (SSG)** (or SSR) to optimize page load speed and improve SEO for the content archive.
- Designed a highly responsive UI with **Tailwind CSS**, featuring real-time search and advanced filtering logic for better user navigation.
- Managed complex application state and data fetching to handle extensive lists of plugins with high performance.

Generative Hub App

[GitHub](#) | [Live Demo](#)

- Developed a feature-rich decentralized application (dApp) for NFT management using **Next.js** and **TypeScript**.
- Built a fully responsive and interactive UI with **Tailwind CSS**, ensuring a seamless user experience across devices.
- Integrated **Thirdweb SDK** to handle secure wallet connection and execute smart contract transactions directly on the client side.
- Optimized image rendering performance for NFT galleries and implemented Server-Side Rendering (SSR) to improve initial load time and SEO.

Experience

Frontend Developer Intern, Vietta
Company

Dec 2024 – Apr 2025

- Contributed to the development of "Antee", an English learning application, by translating Figma designs into high-fidelity code with a focus on UX.
- Built reusable UI components and handled application state, ensuring code maintainability and scalability (Applied Flutter/Dart concepts transferable to React).
- Collaborated closely with the Backend team to integrate RESTful APIs for syncing user progress and dynamic learning materials.
- Identified and resolved critical UI rendering bugs, optimizing app performance for a smoother user experience.

Achievements

- Second Prize at Scientific Research Contest on the topic of microservices architecture. (2024)
- Certificate of participated in the Eureka Student Scientific Research Prize. (2024)
- Certificate of participated in the AI Unlimited Future, Vietnam AI Young Master Award (2025)
- Second Prize at Mammoth Hackathon Vietnam on the topic of Celestia Blockchain. (2025)
- Second Prize at Fintech Hackathon Vietnam on the topic of blockchain. (2025)
- Certificate of participated in the AI Olympiad - OAI HCMC 2025. (2025)

Education

Gia Dinh University, Software Engineer

2023 - Present

- Current GPA: 3.1/4.0
